EXPLORE / LEARN / PRACTICE / PREPARE / CERTIFY / ADVANCE

COURSE OVERVIEW

Build the right preparation plan.

Start with the target role, current experience, intended credential, preferred delivery format, and target date.

FOCUS	LEVEL	DELIVERY
CISSP exam preparation	Experienced professional	Flexible live online, classroom, or corporate learning

WHAT YOU CAN BUILD

Domain coverage Organize study across all eight domains in the current ISC2 exam outline.	Security decisions Connect technical controls to risk, governance, architecture, and business priorities.
Applied review Use scenario-based questions to identify gaps and improve decision-making under exam conditions.	Credential route Understand how examination, experience, endorsement, and ongoing membership fit together.

CURRENT CREDENTIAL GUIDANCE

ISC2

ISC2 defines the CISSP experience, exam, endorsement, and membership requirements. Candidates building the required experience can also explore the Associate of ISC2 option.

Ask an MTK learning adviser which current provider requirements apply before enrolling or booking an exam.

DETAILED SYLLABUS

Move from foundation to applied preparation.

Shape the syllabus around the selected credential version, delivery option, and learner group.

1	Security and risk management	Governance, risk, compliance, ethics, policy, and security programme concepts.
2	Assets and architecture	Asset security plus security architecture and engineering.
3	Networks and identity	Communication and network security together with identity and access management.
4	Assessment and operations	Security assessment, testing, monitoring, incident response, and operational resilience.
5	Software development security	Security within development lifecycles, applications, and supporting environments.
6	Practice and readiness	Question strategy, domain gap analysis, review cycles, and a final preparation plan.

LEARNING ROADMAP

Choose Match the credential to your role and experience.	Plan Align eligibility, version, delivery, and learning support.	Learn Complete guided learning and independent review.
Practice Apply concepts and close knowledge gaps.	Prepare Use mock questions and a readiness plan.	Certify Complete the official assessment and award route.

LEARNING OPTIONS AND NEXT STEPS

Choose the support that fits.

Explore delivery, materials, practice, exam planning, and continued learning support with an adviser.

Delivery Live online, classroom, on-site, or corporate cohort; location and timezone.	Schedule Session dates, live learning hours, independent study, and access period.
Materials Official or provider resources, labs, recordings, and platform access.	Practice Question banks, mock exams, practical work, feedback, and readiness review.
Exam Registration route, voucher, validity, taxes, resit terms, and separate fees.	Support Adviser access, post-training resources, study planning, and team reporting.

CAREER RELEVANCE

This learning may be relevant to: Security consultant, Security manager, Security architect, Security operations and risk leaders. Combine certification learning with relevant experience and practical application to support your professional development.
